

Question 12.7

Consider the following function,

$$z = x^2 + y^2$$

In which direction is the directional derivative of z at the point $(2,3)$ most positive?

- a. $\hat{i}$
- b. $\hat{i} + \hat{j}$
- c. $-\hat{i} + \hat{j}$
- d. $-\hat{i} - \hat{j}$
