

SYDE252 - W03C – System Problems

Dr. Matt Borland

Problem 1.7-10

$$y(t) = 0.5 \int_{-\infty}^{\infty} x(\tau) [\delta(t - \tau) - \delta(t + \tau)] d\tau$$

Explain what this system does...

Problem 1.7-10

$$y(t) = 0.5 \int_{-\infty}^{\infty} x(\tau) [\delta(t - \tau) - \delta(t + \tau)] d\tau$$

Is it linear?

Problem 1.7-10

$$y(t) = 0.5 \int_{-\infty}^{\infty} x(\tau) [\delta(t - \tau) - \delta(t + \tau)] d\tau$$

Is it invertible?

Graphical Convolution Example
