

Quiz 1 will be 40 minutes in length and will be held in your normal classroom during class time on June 5th.

For quizzes and midterm you will only be allowed a UW approved scientific calculator (like the normal ones, not graphing, not your phone).

Exams are expected to be written in pen. If there are scanning issues due to you using pencil, we can only grade what we can read.

Any formulas, identities, or other info will be provided to you on an equation in the exam booklet or in the question directly.

You will need to be able to do basic integration/math, but don't need to remember full lists of trig identities or tables of Laplace transform pairs.

Just so it's clear, the content Quiz 1 will cover on June 5th is only the content found in [SYDE252-S2026-Assignment 1-Solutions](#).

SYDE252 - W04C – Quiz 1
